

accord™ collection

WIELAND

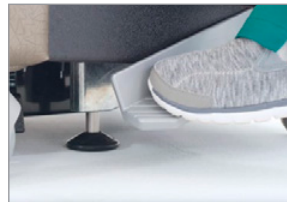

the recliner that does

Partnering with patients, clinicians and designers, the accord™ recliner addresses caregiver safety, patient comfort and design flexibility.

nurse health & safety

safeBrake grips the floor securely, delivering exceptional stability. An industry first, only Wieland separates the casters and brakes. Accord's dedicated brake system outperforms brake systems that are combined with the casters.

- makes a solid stop on uneven floors
- greater surface area increases staying power
- brake retracts completely when not in use
- brake pads stay clean

intelliTrac™ casters auto-align and auto-release offering the control to change direction quickly from straight to sideways.

- track straight or move perpendicular with a nudge
- designed to work with the safeBrake system, casters will not rotate or roll when brake is engaged
- available in 3 colors

sideways

straight

quick release seat option provides easy access for cleaning and infection control

transfer arm is a front-released arm that pivots towards the back of the chair for an obstacle-free, hands-free patient transfer.

controlCove is centrally located foot pedals that are conveniently accessed from the front - no bending, stooping or reaching required.

design flexibility

- aesthetically considerate of any architectural style
- the recliner's faceted back features a slimming two-panel design creating a waistline while giving the chair an open feel

built to last

- high strength 10-gauge steel recliner frame with welded arm support for rigidity and longevity
- recliner ottoman is 30% wider than standard ottomans, offering more comfort for patients
- soft edges and corners with thick, dense foam prevents damage to walls and upholstery

collection highlights

- Renewable upholstery and components
- Standard moisture barrier
- GREENGUARD® Certified for low chemical of patient comfort emissions UL.COM/GG UL 2818

recliner

- SafeBrake provides exceptional stability by gripping the floor rather than merely stopping the casters
- The IntelliTrac™ casters system helps guide the chair straight down a corridor to minimize strain on the caregiver
- Arm caps available in wood, urethane, or thermoform
- Adjustable headrest adds comfort and visual interest
- Quick release seat option supports infection prevention efforts
- Recline Mechanism, Transfer Arm, IntelliTrac casters and safeBrake 10 year warranty
- Standard casters 3 year warranty

sleep chair

- One step conversion to sleep surface
- 72" sleep surface when extended
- Available wide scale
- Arm caps available in solid surface, urethane, or thermoform
- Inherent wallsaver feature when chair is in closed position
- 25 year warranty; 10 on mechanism
